

DigiCert Corporate Overview

About the Company

DigiCert is the world's leading provider of scalable TLS/SSL, IoT and PKI solutions for identity and encryption. The company is recognized for its enterprise-grade certificate management platform, fast and knowledgeable customer support, and market-leading security solutions. For the latest DigiCert news and updates, visit digicert.com or follow @digicert.

The most innovative companies, including 88% of the Fortune 500 and 98 of the 100 top global banks, choose DigiCert for its expertise in identity and encryption for web servers and Internet of Things devices. DigiCert fills an important role in the economy, securing more than 28 billion web connections every day.

Headquartered in Lehi, Utah, DigiCert is privately owned and employs around 1,200 workers with support from 16 offices in California and internationally. DigiCert has the industry's top talent and resources to accelerate innovation of SSL and PKI solutions and continue to shape industry standards work that keeps its customers at the forefront of evolving security threats and solutions.

About the Products

DigiCert innovates to advance TLS and PKI-based solutions for securing the enterprise and emerging markets such as IoT, cloud, and DevOps. DigiCert CertCentral® is an award-winning, enterprise-grade TLS management platform. DigiCert ONE is a modern, holistic approach to PKI management. Based on an advanced, container-based design, DigiCert ONE allows customers to rapidly and flexibly deploy in any environment, automate enrollment, and customize workflows.

DigiCert is a pioneer with customer-focused products, tools, and platforms that advance strong security,

including being the first certificate authority (CA) to:

- Offer PQC test kit
- Offer unlimited reissues and enable Wildcard certificates
- Offer CT log monitoring service
- Partner with Microsoft in enabling EV Code Signing certificates from day one
- Launch independent Certificate Transparency Log Server
- Offer TLS for Tor browser
- Develop Multi-Domain (SAN) certificates in partnership with Microsoft
- Issue certificates that meet the Direct protocol and are cross-certified with the U.S. FBCA for secure health records exchange
- Market unlimited server licenses and free reissues
- Market free duplicate certificates
- Issue certificates to provide identity for drones

Supporting its customers' needs for PKI-based security solutions that scale and save costs, DigiCert focuses on standards-based offerings that integrate with customer systems and platforms and drive automation in the enterprise via APIs and leading certificate enrollment protocols. The company offers an award-winning support team, available online or offline 24/7 and in multiple languages.

Mission

DigiCert is intent on continuing to drive the online trust market toward better practices by providing higher trust and value to its consumers. DigiCert sets high goals for its product innovation, industry standards support, and superior customer experience.
