

Understanding your DNS Made Easy bill

Avoid surprise charges by upgrading today

Your DNS Made Easy plan is built on a tiered system, with each package including a set number of monthly DNS queries. If your usage stays within that limit, you'll only pay your regular plan fee. When your queries exceed the allowance, additional usage is billed as overages at a fixed rate per million queries, dependant on your current package.

You can always upgrade to a higher tier to avoid these recurring overage charges.

Overage charges increase progressively, based on your monthly queries-per-month range above your plan limit.

If you exceed your pre-purchased quota for the month, you will be billed at the following rates:

Business and DNS-25 memberships → \$6.00 per 1 million queries per month

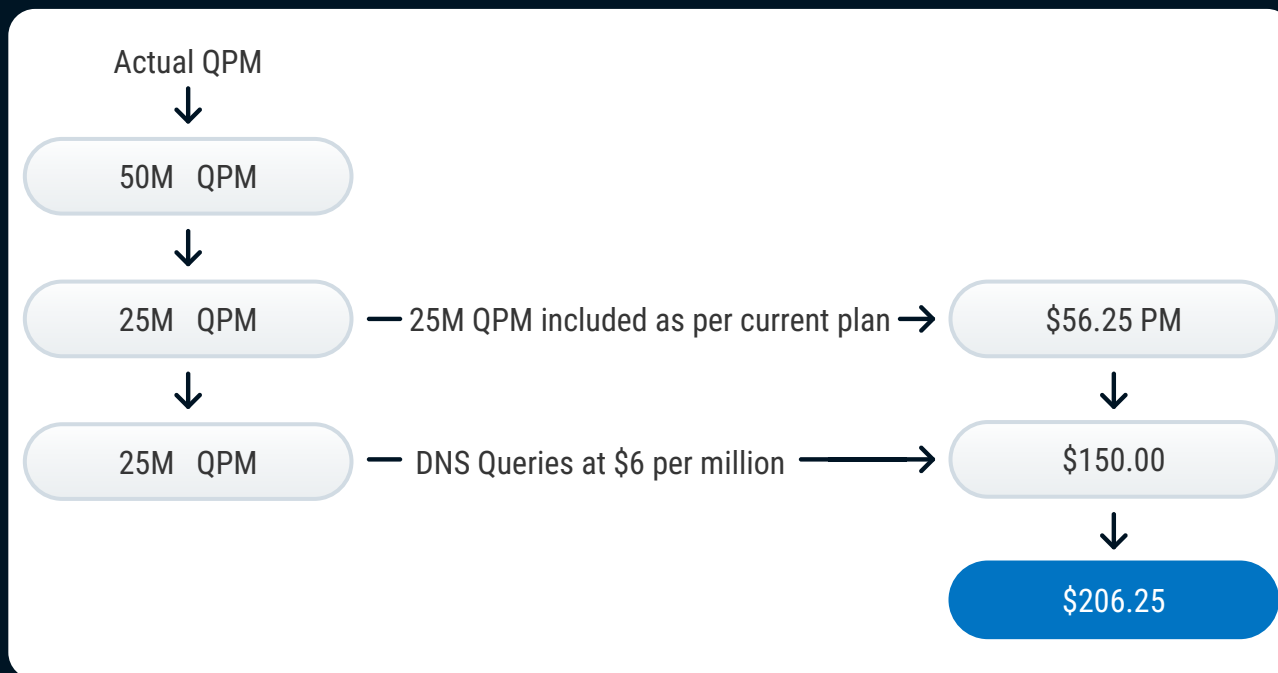

Corporate membership → \$0.48 per 1 million queries per month

Enterprise membership → Tailored pricing based on your requirements

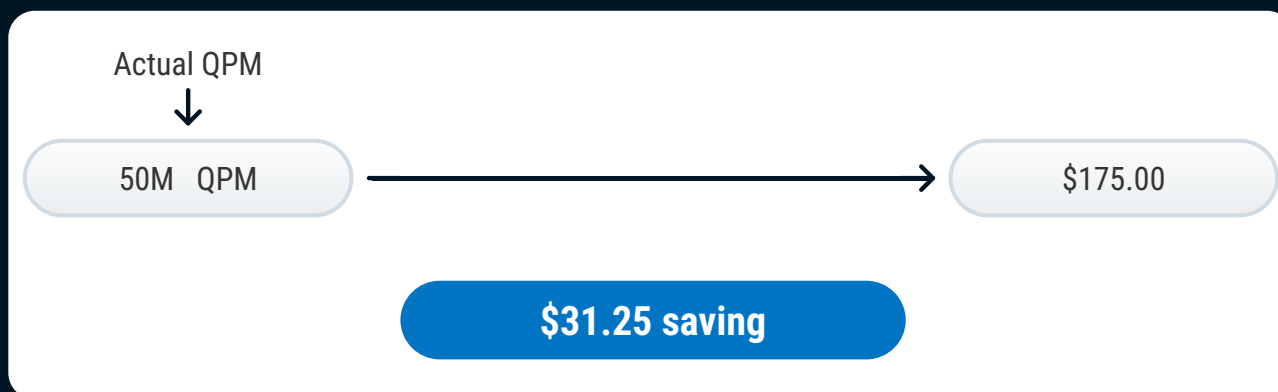

Upgrade and save!

Example of saving by upgrading

Customer A currently on DNS-25 plan (25M QPM)

Customer A moved to Corporate DNS-50 plan (50M QPM)
