

Managing DigiCert CertCentral TLS Manager

Fast Facts

-  Self-paced online learning
-  4.5 hours of learning and assessment
-  DigiCert Solutions Engineer Certification

About this course

This course will provide you with a comprehensive understanding of the DigiCert CertCentral TLS Manager, encompassing tasks such as creating and managing user roles. Additionally, this course delves into the various certificate types accessible in CertCentral TLS Manager, detailing the process of ordering and overseeing certificate lifecycle functions.

The course will prepare you for the Managing DigiCert CertCentral TLS Manager Technical Professional certification exam. Successful completion of the exam will certify you as a DigiCert CertCentral TLS Manager Technical Professional.

Course Outline

Certificate Overview	Managing Public Trust with CertCentral TLS Manager	CertCentral TLS Manager Account Management
<ul style="list-style-type: none"> • Describe the purpose of multi-year plans and demonstrate how to select multi-year plans within CertCentral TLS Manager • Discuss the process of downloading the DigiCert Smart Seal from within CertCentral TLS Manager I and configuring • Describe certificate profile options available in CertCentral TLS Manager e.g., HTTP Signed Exchange 	<ul style="list-style-type: none"> • Describe the features and benefits of CertCentral TLS Manager • Demonstrate proficiency in using CertCentral TLS Manager to efficiently manage SSL/TLS certificates, including issuance, renewal, and revocation processes • Describe the policies and methods used by DigiCert for domain and organization validation • Demonstrate the management of orders, certificates, organizations, and domains in CertCentral TLS Manager • Describe the reporting options available in CertCentral TLS Manager • Discuss the different tool options available within CertCentral TLS Manager and the purpose of each tool 	<ul style="list-style-type: none"> • List and compare the user roles in DigiCert CertCentral TLS Manager • Explain and demonstrate the user access/authentication control methods in CertCentral TLS Manager, e.g., SAML, 2FA • Explain and demonstrate the use of divisions in CertCentral TLS Manager • Describe and demonstrate guest access options in CertCentral TLS Manager • Describe the purpose of audit logs and demonstrate how to access the audit logs in CertCentral TLS Manager

What is DigiCert University?

DigiCert University is a non-degree granting, online learning portal that offers short online, self-paced and virtual instructor led training covering a variety of digital trust related topics and solutions. DCU offers training for both sales and technical professionals in the security industry.

Who Should Attend

This course will benefit anyone responsible for sales engineering pre-sales support, service deployment planning and implementation, and technical support of digital trust solutions. Participants should have experience performing Microsoft domain administration tasks, basic networking configuration, and foundational knowledge of PKI concepts such as cryptography and encryption. Familiarity with the Unix/Linux command line and experience running simple commands is an asset.

Partners seeking to qualify for DigiCert partner program benefits may be required to complete technical certification training depending on their partner tier. Please check with your DigiCert Channel Account manager for details.

Learn At Your Own Pace

The Managing DigiCert CertCentral TLS Manager course is available on DigiCert University. The course is self-paced, allowing learners to complete the course as per their schedule. The course features multimedia content, including videos, interactive activities, and diagrams, providing an engaging and informative learning experience.

Course Registration

Anyone wishing to register for a DigiCert University account and enrol in any of the DigiCert certification training should email:

DCU_Help@Digicert.com

DigiCert partners can enroll for courses in DigiCert University via the [DigiCert Partner Portal](#). Depending on your role, you will be enrolled in sales and technical certification courses. Please contact your DigiCert Channel Account Manager for further information regarding course enrollment or certification requirements for DigiCert partners.

DigiCert CertCentral TLS Manager Technical Professional

The DigiCert logo, consisting of the word "digicert" in a lowercase, sans-serif font with a registered trademark symbol, enclosed in a white rounded square border.

**DIGICERT CERTCENTRAL
TLS MANAGER
TECHNICAL PROFESSIONAL**
V23.12

Earners of the Managing CertCentral TLS Manager Technical Professional certification are well-versed in the intricacies of SSL/TLS and Code Signing certificate products offered in DigiCert CertCentral TLS Manager. Additionally, this certification empowers individuals with the expertise to navigate and optimize the features of CertCentral TLS Manager, ensuring a secure and streamlined certificate management experience. Ultimately, they emerge with the competence to oversee and enhance the security infrastructure of digital certificates within an enterprise setting.
