

Managing DigiCert CertCentral TLS Manager

About this course

This course equips administrators with the skills to confidently manage digital certificates in DigiCert CertCentral. Learn how to organize subaccounts, automate issuance with ACME, and customize notifications and reports to enhance visibility and control. By mastering CertCentral's key tools and workflows, you'll streamline certificate operations, strengthen security, and ensure your organization stays compliant and audit-ready

Fast Facts

Format:

Self-paced online learning

Assessment:

30-minute assessment

Duration:

70 minutes of course content

Certification requirement:

Part of the DigiCert Solutions Engineer certification

What you will learn

Core Area	Key Topics Covered
CertCentral Dashboard	Identify and interpret key insights on certificate activity, upcoming expirations, and important industry updates.
Sub-account Management	Configure and manage subaccounts to enable flexible billing, permissions, and pricing while maintaining centralized oversight.
Certificate Requests & Approvals	Demonstrate how to submit, review, and approve certificate requests using customized approval workflows.
Custom Email Templates	Design and customize branded email notifications to align with organizational communication policies.
ACME Automation	Implement and automate certificate issuance using ACME, from setup and configuration through approval.
REST API Integration	Apply REST-based APIs to generate, submit, and query certificate requests for automation and reporting.
Reports Library	Generate, analyze, and export detailed operational reports to monitor certificate performance and compliance.
Account Finances	Evaluate and track account spending, analyze purchase history, and manage account balances.

Core Area	Key Topics Covered
Order Management	Navigate the orders page to monitor certificate status, manage reissues, and understand order workflows.
Lifecycle Notifications	Configure and adjust renewal reminders and notification settings to maintain proactive certificate management.
Pre-validation	Prepare and validate organizations and domains in advance to streamline certificate issuance.
Audit Logs	Access, filter, and analyze audit data to evaluate account activity and ensure compliance.
User & Division Management	Add, assign, and manage user roles and divisions to control access and organize certificate management across teams.
Account Security & Preferences	Configure authentication settings, enforce password policies, and apply IP restrictions and validation preferences to enhance account security.
Support & Help Resources	Locate and utilize support tiers, account management resources, and help documentation to resolve operational issues effectively

What is DigiCert University?

DigiCert University is a non-degree granting, online learning portal that offers short online, self-paced and virtual instructor-led training, covering a variety of digital trust-related topics and solutions. DigiCert University offers training for both sales and technical professionals in the security industry.

Who should attend?

This course will benefit anyone responsible for:

Sales engineering
pre-sales support

Service deployment planning
and implementation

Technical support of
digital trust solutions

This course is designed for certificate administrators, IT managers, and security professionals responsible for managing TLS certificates and enforcing certificate policies within their organizations.

Learn at your own pace

The Managing DigiCert CertCentral TLS Manager course is hosted on DigiCert University. It's fully selfpaced and includes interactive multimedia content and practical demonstrations.

Course Registration
