

# DigiCert Corporate Overview

## About the Company

DigiCert is a leading global provider of digital trust, enabling individuals and businesses to engage online with the confidence that their footprint in the digital world is secure.

DigiCert® ONE, the platform for digital trust, provides organizations with centralized visibility and control over a broad range of public and private trust needs, securing websites, enterprise access and communication, software, identity, content and devices.

DigiCert pairs its award-winning software with its industry leadership in standards, support and operations, and is the digital trust provider of choice for leading companies around the world.

Headquartered in Lehi, Utah, DigiCert is privately owned and employs around 1,200 workers with support from 16 offices in California and internationally. DigiCert has the industry's top talent and resources to accelerate innovation of SSL and PKI solutions and continue to shape industry standards work that keeps its customers at the forefront of evolving security threats and solutions.

## About the Products

DigiCert innovates to advance TLS and PKI-based solutions for securing the enterprise and emerging markets such as IoT, cloud, and DevOps. DigiCert CertCentral® is an award-winning, enterprise-grade TLS management platform. DigiCert ONE is a modern, holistic approach to PKI management. Based on an advanced, container-based design, DigiCert ONE allows customers to rapidly and flexibly deploy in any environment, automate enrollment, and customize workflows.

DigiCert is a pioneer with customer-focused products, tools, and platforms that advance strong security, including being the first certificate authority (CA) to:

- Offer PQC test kit
- Offer unlimited reissues and enable Wildcard certificates
- Offer CT log monitoring service
- Partner with Microsoft in enabling EV Code Signing certificates from day one
- Launch independent Certificate Transparency Log Server
- Offer TLS for Tor browser
- Develop Multi-Domain (SAN) certificates in partnership with Microsoft
- Issue certificates that meet the Direct protocol and are cross-certified with the U.S. FBCA for secure health records exchange
- Market unlimited server licenses and free reissues
- Market free duplicate certificates
- Issue certificates to provide identity for drones

Supporting its customers' needs for PKI-based security solutions that scale and save costs, DigiCert focuses on standards-based offerings that integrate with customer systems and platforms and drive automation in the enterprise via APIs and leading certificate enrollment protocols. The company offers an award-winning support team, available online or offline 24/7 and in multiple languages.

## Mission

DigiCert is intent on continuing to drive the online trust market toward better practices by providing higher trust and value to its consumers. DigiCert sets high goals for its product innovation, industry standards support, and superior customer experience.
