

GENERAL SESSIONS

General Session, Part 1

In Security Summit 2022's opening general session, members of the DigiCert executive and product teams will explore the present and future of our “always moving” digital security landscape—and show how automation and other DigiCert innovations will help keep you ahead of the security game. Then, renowned hacker, inventor, entrepreneur, and futurist Pablos Holman will expand the discussion with a provocative, optimistic vision of the future, including fascinating examples that show the immense potential of new technology to change our world for the better.

General Session, Part 2

Part 2 of the opening general session will dive deeper into the promise and potential of the entire DigiCert portfolio—and show how DigiCert's technology infrastructure is evolving to meet the requirements of today's always moving security landscape. Then, we'll close our general session on a high note with a fast-paced, engaging conversation with special effects designer, science educator, and co-host of the popular TV show Mythbusters Adam Savage, who will share stories and insights from his long, fascinating, and always moving life and career.
