

DigiCert Technical Certifications CertCentral® Automation Expert Training Guide

Introduction

This training guide is designed to help you prepare for the **DigiCert Technical Certification: CertCentral® Automation Expert** assessment exam. The exam will consist of 50 multiple-choice questions with a maximum time allowed of 1 hour.

The intended audience for this assessment is technical personnel who need to install, configure and troubleshoot the **Discovery** and **Automation** options within DigiCert CertCentral.

Objectives

Before attempting the **DigiCert Technical Certification: CertCentral Automation Expert** assessment exam, you should be able to do the following:

- Describe the benefits of the DigiCert CertCentral Discovery feature.
- Describe the benefits of the DigiCert CertCentral Automation feature.
- List the platforms supporting the DigiCert Discovery sensor.
- List the platforms supporting the DigiCert Automation agent.
- Describe the DigiCert sensor installation process.
- Describe the DigiCert automation agent installation process.
- Describe DigiCert agentless (sensor) automation configuration and operation.
- Create and manage automation profiles in DigiCert CertCentral.
- Create and manage Discovery Scans in DigiCert CertCentral.
- Describe the detailed certificate and end-point information available from Discovery scans in DigiCert CertCentral.
- Describe the differences between Cloud Discovery and Sensor Discovery.
- Configure and manage certificate automation in DigiCert CertCentral.
- Configure and manage ACME directory URLs in DigiCert CertCentral.
- List the API functions available for DigiCert Discovery and Automation functions.
- Perform basic troubleshooting for common sensor and agent configuration problems.

Training Guide

Before attempting a certification assessment, you should review the objectives above.

DIGICERT® CERTIFICATION PROGRAM

If you believe that you are already able to meet all the objectives listed, you are welcome to schedule an assessment. However, if there are any objectives listed where you may need additional preparation, you should plan to research these topics in detail prior to scheduling an assessment.

Below you will find links for e-learning, downloads and relevant websites. Please note – these resources are just a starting point! It is strongly recommended that you do further research in order to be fully prepared for an assessment on all the objectives. This could include research on the internet (e.g. Wikipedia) and/or hands-on experience using DigiCert CertCentral® Discovery and Automation.

In addition to the self-directed learning options described above, it may be possible to attend a DigiCert instructor-based workshop which will give in-depth information on many of the assessment objectives. Please contact your DigiCert account manager if you would like to find out more.

Pre-requisite Qualifications

It is strongly recommended to achieve **DigiCert CertCentral® Professional** certification before attempting the **DigiCert Technical Certification: CertCentral® Automation Expert** assessment exam. More information can be found in the **DigiCert CertCentral® Professional Training Guide** which can be downloaded from <https://www.digicert.com/tls-ssl/tls-certification-program>.

A basic knowledge of IP networking concepts is also recommended.
