

DigiCert Releases New SSL Utility Tool Manage Windows SSL Installations with Ease

DigiCert, Inc. has created a free tool designed to simplify the lives of server administrators who manage SSL certificates.

The SSL Certificate Management and Troubleshooting Tool provides a consolidated view of a server's certificates and includes the details

certificates, fix untrusted warning messages, create backups, and test certificates to ensure proper operation.

Managing a server's certificates should be painless. This tool is designed to help administrators manage and troubleshoot certificates easily and efficiently in one place.

for each one: the domain it's issued to, expiration date, serial number, and issuer of the certificate. Even if certificates are not issued by DigiCert, they are still available for management through this utility.

The Certificate Management Tool also makes it simple to import and export

As part of a larger goal of enabling a secure Internet, this tool is available free of charge at www.digicert.com/util.

If you have any questions about SSL certificates or DigiCert's services, feel free to contact our support team at 1-800-896-7973 (+1-801-701-9600) or email support@digicert.com.

Become a Fan, Get a Shirt

Want a DigiCert t-shirt? Get one for free by becoming a fan on Facebook and/or following us on Twitter. T-shirts are available in white, blue, black, red, for men's or pink in women's, ranging from size Small to XXXL.

For more details: www.digicert.com/facebook.htm. Once you sign up, send your preferred shipping address, and a shirt will be on its way!

OTA CyberSecurity Forum

Online Trust Alliance Event in D.C.

On September 22–24, the Online Trust Alliance (OTA) will host its 5th annual Online Trust and Cybersecurity Forum at Georgetown University in Washington, DC. The Forum will focus on ways for organizations to protect their data and reputation from being compromised in order to maintain trust with consumers.

The keynote speaker will be Greg Link, President and Co-Founder of the Global Speed of Trust

Practice, who will discuss the key principles behind Stephen M. R. Covey's bestseller, *The Speed of Trust*.

As Covey's business partner, Link is an expert on the topic in addition to being a well-respected leader in the business world.

DigiCert, Inc. is proud to be a Gold Sponsor of the event. Anyone interested in attending can register at <https://otalliance.org/> and

use the code OTAPA200 to save \$200 off of the registration fee.

Those who register by July 31st will save an additional \$200.

National Strategy for Trusted Identities

White House Document on Cybersecurity

U.S. President Barack Obama has created a new office solely dedicated to the issues surrounding cybersecurity. President Obama has said, "cyber threat is one of the most serious economic and national security challenges we face as a nation" and that "America's economic prosperity in the 21st century will depend on cybersecurity."

"America's economic prosperity in the 21st century will depend on cybersecurity."

The U.S. cybersecurity strategy has two main goals:

- (1) improve resilience to cyber incidents and
- (2) reduce the cyber threat.

-President Obama

One of NSTIC's first action items is creating an Identity Ecosystem, a landscape where all parties involved in an online transaction can be confident in each other's identities and the identity of the infrastructure.

The newly formed Cybersecurity Office will be led by U.S. Cybersecurity Coordinator Howard Schmidt. In a blog post on June 25, Schmidt announced the NSTIC draft website where the general public can submit, comment on, or vote for ideas. Feedback will be accepted through July 19th at www.nstic.ideascale.com and DigiCert, Inc. encourages readers to get involved and provide input.

Managed Public Key Infrastructure

Enterprise Managed Public Key Infrastructure (PKI) enables you to take control of SSL certificate management.

Issuing new certificates or managing existing certificates is available on demand through this service, offered free of charge to those needing a significant volume of certificates.

Managed PKI customers enjoy all the benefits of being a DigiCert customer: top-notch support, flexible features, and low prices, all while being in control of their own certificate needs. DigiCert will pre-validate domain names so you can simply click to issue certificates.

For more information or to find out if Managed PKI is right for your organization, visit:
