

DigiCert Receives Customer Support Award Online Trust Alliance Recognizes Leaders

At this year's Online Trust and Cybersecurity Forum, the Online Trust Alliance (OTA) awarded DigiCert with the [2010 Excellence in Customer Support](#) award for "unwavering commitment to support and customer satisfaction, including 24x7 support, 'hand-holding' of small businesses, and direct follow-up."

In addition to this award, DigiCert also received special recognition for being a member of the OTA Steering Committee.

The 2010 Forum featured a comprehensive group of cybersecurity, privacy, public policy, and marketing experts who presented tips and strategies for organizations to implement to protect their brands, reputations, and customers from online fraud.

Many of the sessions and workshops focused on internal practices, such as email authentication, privacy policies, and business and law enforcement, that can help organizations be more prepared to prevent and handle cybersecurity incidents.

Additionally, there was general discussion about industry happenings, including evolving cyber threats and the National Strategy for Trusted Identities in Cyberspace

(NSTIC) plan for improving online trust.

DigiCert was proud to be a Gold Sponsor of the event and fully supports the OTA and its mission to increase trust in the online community.

iPad Giveaway!

Want a chance to win a free iPad? It's easy! First, become a fan of DigiCert on Facebook. Then, post on our wall about a worthwhile experience you had with us, why you switched to DigiCert, or how we compare to other SSL certificate providers. That's it! We'll automatically enter you into a drawing for a free iPad and announce the winner on October 29, 2010.

Flat-fee Pricing for Higher Education

Educational SSL Certificate Pricing

At DigiCert, we provide the best value in SSL with flat-fee pricing for higher education organizations through the Managed Public Key Infrastructure (PKI) interface. Our flat-fee pricing option for educational institutions features the following benefits:

One-time annual fee

All of your SSL expenses are covered for an entire year, eliminating the need to pay for each certificate issued

Unlimited SSL and client certificates

Flexibility in issuing certificates, including Extended Validation (EV) certificates

Flexibility through the Managed PKI system

Manage your certificates through the easy-to-use Managed PKI interface

For customized pricing information and questions about our flat-fee pricing, please send an email to education@digicert.com or visit <http://www.digicert.com/education.htm>.

Client Certificates for Enterprise

DigiCert will soon be offering client certificates through our Managed Public Key Infrastructure (PKI) system.

Managed PKI is a service DigiCert offers that empowers customers requiring a high volume of SSL certificates to manage them on demand from one central location.

In addition to being able to issue new certificates and reissue, replace, or revoke existing certificates, Managed PKI customers also enjoy all the benefits of being a DigiCert customer: low prices, 24-hour support, and flexible features.

To find out if Managed PKI is right for your organization or if you have questions about this service, please visit our [website](#) or call us at 800-896-7973.
