

DigiCert Hosts TAGPMA

2011 TAGPMA meeting hosted in DigiCert offices

Earlier this month, DigiCert hosted The Americas Grid Policy Management Authority (TAGPMA) and their 13th annual Face-to-Face Meeting at the DigiCert corporate offices in Lindon, UT.

TAGPMA is the accrediting body responsible for grid authentication systems and authorities in the Americas. Grid systems deal with supercomputing capacity and the users that are authorized to utilize these resources.

TAGPMA's mission is to help deploy grids across the globe while working with other PMA bodies to define minimum requirements and authentication profiles for grids.

TAGPMA met this year to receive accreditation reports from the chairs of both the Asia-Pacific Grid Policy Management Authority (APGridPMA) and the European Policy Management Authority for Grid Authentication (EUGridPMA).

The relationship between CA issuers and Registration Agents was also discussed and minimum standards were proposed for the remote management of private keys.

For questions about DigiCert's products or services, please contact the support team at 1-800-896-7973 or send them an email to support@digicert.com.

Managed PKI

DigiCert's Managed Public Key Infrastructure (PKI) system allows customers who need a large quantity of SSL certificates to manage their certificates from one central location.

Perform administrative certificate control tasks, organize certificates within Business Units, manage account funds, and so much more through the Managed PKI interface. For questions about Managed PKI or enterprise accounts, please contact our sales team by sending an email to enterprise@digicert.com or call 1-855-800-3444.

ClickID Preview

New authentication product soon-to-be available

ClickID, the site seal product powered by DigiCert, will soon be available. We wanted to let our newsletter customers be the first to know and get a preview of this new authentication product.

Site seals help to increase traffic and give visitors more confidence when coming to your site because of the identity verification that the ClickID seal represents.

Since so many organizations rely on a successful Internet presence, it is extremely important to establish online legitimacy. ClickID provides this assurance by confirming to site visitors and users that the rightful owner to the site has been validated by proper authentication procedures.

More information about the ClickID product, features, and pricing will be available soon. Stay tuned for more updates!

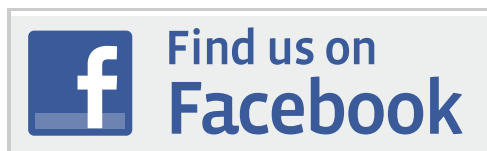

Follow DigiCert on Twitter and Facebook

Get involved through social media

Following DigiCert on Twitter and/or Facebook is a great way to get involved with a community of peers to discuss topics such as SSL, authentication, and encryption. You can also learn more about what's going on in the Internet security industry through the articles and breaking news items that we post as well.

Updates on DigiCert products, events, and promotions are also posted to our social media accounts so followers are the first to hear our exciting announcements.

To find our official pages, simply click on the images above to start following DigiCert and become "in-the-know" for great information and announcements!
