

Document Signing: The Benefits & How It Works

Document signing certificates allow you to add a digital signature to a document to prove the identity of the sender. This signature ensures you that the document hasn't been altered, and that you can trust its contents. Unlike an e-signature, a digital signature is virtually impossible to forge.

Sign All Document Types

You'll be able to sign documents in top programs, including Microsoft Office®, Adobe® Acrobat and Adobe Reader, LibreOffice®, and OpenOffice®.

Make Documents Legally Binding

When you sign documents with DigiCert Document Signing, they comply with the U.S. Federal E-SIGN Act and assorted international laws.

Add a Layer of Security

Document signing is more secure than typical e-signatures because it requires both a password and an encrypted USB token, often called two-factor authentication.

Avoid Expiration

Your digital signature never expires. If the document is changed at any point, the recipient will be notified. Your digital signatures can also be timestamped to increase security.

How Document Signing Works

What Does a Digital Signature Look Like?

Features & Pricing				
	Individual 500	Individual 2000	Organization 2000	Organization 5000
1-year price	\$379 USD	\$579 USD	\$579 USD	\$895 USD
2-year Price (per year)	\$339 USD	\$514 USD	\$514 USD	\$799 USD
3-year Price (per year)	\$299 USD	\$465 USD	\$465 USD	\$716 USD
Number of documents signed per year	500	2000	2000	5000
Encrypted digital signature	✓	✓	✓	✓
Two-factor authentication using a hardware token	✓	✓	✓	✓
Individual Verification	✓	✓		
Whole Organization Verification			✓	✓

Why Choose DigiCert?

Market-Leading Platform & Tools

Maintaining a secure network goes beyond purchasing and installing SSL certificates—it includes proper configuration, vulnerability scanning, ongoing monitoring, and timely renewal. The DigiCert platform and tools allow you to automate certificate tasks, making management easy.

24/7 Customer Support

DigiCert's award-winning technical support team is available any time you need help, and certificates are validated around the clock. Organizations are given a dedicated account representative who is a committed partner in your security.

Securing Top Brands

As the world's leading high-assurance digital certificate provider, we're lucky enough to work with some of the most innovative companies in the world, including those shaping the Internet of Things (IoT). Along the way, we secure more than 26 billion web connections every day.
