

# DigiCert Corporate Overview

## About the Company

DigiCert is a leading global provider of digital certificates. The world's top banks, e-commerce, technology, healthcare, and manufacturing companies rely on DigiCert to provide scalable encryption and authentication for their most valuable online properties. Beyond the web, DigiCert innovates with scalable, automated PKI-based solutions for identity, authentication, and encryption for the Internet of Things (IoT) and other emerging, connected markets.

The most innovative companies, including the Global 2000, prefer DigiCert. DigiCert fills an important role in the economy, securing more than 26 billion web connections every day.

The company supports SSL/TLS and other digital certificates for PKI deployments at any scale through its certificate lifecycle management platform, CertCentral®. The company has been recognized with dozens of awards for its enterprise-grade management platform, fast and knowledgeable customer support, and market-leading growth.

Headquartered in Lehi, Utah, DigiCert is privately owned and employs more than 1,000 workers with support from offices in California and internationally. With the addition of Symantec's Website Security team, DigiCert has the industry's top talent and resources to accelerate innovation of SSL and PKI solutions and continue to shape industry standards work that keeps its customers at the forefront of evolving security threats and solutions.

## About the Products

DigiCert innovates to advance SSL and PKI-based solutions for securing the enterprise and emerging markets such as IoT, cloud, and DevOps. DigiCert CertCentral® is an award-winning, enterprise-grade

certificate management platform. DigiCert is a pioneer with customer-focused products, tools, and platforms that advance strong security, including being the first certificate authority (CA) to:

- Offer unlimited reissues and enable Wildcard certificates
- Partner with Microsoft in enabling EV Code Signing certificates from day one
- Launch independent Certificate Transparency Log Server
- Offer TLS for Tor browser
- Develop Multi-Domain (SAN) certificates in partnership with Microsoft
- Issue certificates that meet the Direct protocol and are cross-certified with the U.S. FBCA for secure health records exchange
- Market unlimited server licenses and free reissues
- Market free duplicate certificates
- Issue certificates to provide identity for drones

Supporting its customers needs for PKI-based security solutions that scale and save costs, DigiCert focuses on standards-based offerings that integrate with customer systems and platforms and drive automation in the enterprise via APIs and leading certificate enrollment protocols. The company offers an award-winning support team, available online or offline 24/7 and in multiple languages.

## Mission

DigiCert is intent on continuing to drive the online trust market toward better practices by providing higher trust and value to its consumers. DigiCert sets high goals for its product innovation, industry standards support, and superior customer experience.
